

Many people working with elderly patients have told us that they are having shortages in their supplies of oxygen. Are you finding that too?

We offer two products at deep discounts to provide oxygen during this crisis.

First, we have a portable, easy to use, stable source of oxygen for people with trouble breathing, mild COPD, asthma attacks, severe allergic reactions, or as an emergency oxygen source until an ambulance arrives. It now costs \$199, 50% off its pre-crisis price, or you can choose a subscription plan with replacements at <https://rapidoxygen.com/> (use code "Empire" when ordering).

Second, for people with chronic lung ailments (e.g. Severe COPD, pulmonary fibrosis, and COVID-19 survivors) who are having trouble refilling oxygen tanks, we provide oxygen concentrators that dispense 100% pure oxygen filtered from ambient air through a small nasal tube day and night. We offer two models: a stationary, at-home, institutional model and a smaller, portable version with a rechargeable battery (below) available at <https://alvalifecare.com/> (use code "Empire" when ordering).

Because of COVID-19, we are offering these products at deep discounts. If you would like to buy both, we have special bundle pricing.

Please call (203) 989-0100 or email info@rapidoxygen.com.
